EDUCATION

Xidian University

Bachelor of Computer Science

Xi'an, China

June 2022

- GPA: 3.8 rank:2/119
- 2019 Outstanding student of college level
- 2019 Second prize in the National Mathematics Competition for College Students
- 2019 First prize of Shaanxi Advanced Mathematics Competition
- 2019 Second-class university scholarship
- 2020 Outstanding student of university level
- 2020 First-class university scholarship
- 2020 Second prize in the National Mathematics Competition for College Students

Nanjing University

Master of Computer Science

Nanjing, China

Expected June 2025

EXPERIENCE

Research Intern

June 2020 – June 2022

Xidian University

National Laboratory of Radar Signal Processing

- Probabilistic topic model and natural language processing, advised by Prof. Bo Chen
This experience gives me an introduction to natural language processing and topic models, especially makes me familiar with the series of works by Prof. Bo Chen. Further, I help with some coding work for radar high-resolution range profile.

Research Intern

January 2021 – April 2021

Key Laboratory of Intelligent Perception and Image Understanding of Ministry of Education

Xidian University

- Video Super Resolution, advised by Prof. Fanhua Shang
I serve as a core member to build models to improve video super-resolution. Our method simultaneously conducts frame interpolation and super-resolution.

Research Intern

December 2021 – June 2023

Remote

Stanford University

- Explainability for graph neural networks, advised by Shirley Wu
We primarily focus on how to generate counterfactual explanations for GNNs. We develop a learning framework and a controlled generative model for generating graph counterfactual explanations.

Research

September 2022 – May 2023

State Key Laboratory for Novel Software Technology at Nanjing University

Nanjing University

- Emotion recognition and Dialogue modeling, advised by Dr. Zhen Wu and Prof. Xinyu Dai
In this work, we aim to recognize emotion for each utterance in a multi-party dialogue. We develop a contrastive learning framework to better distinguish similar emotions, which achieves state-of-the-art performance.

Research Intern

September 2023 – Present

University of California, San Diego

Department of CSE

- Constrained and controllable text generation, advised by Lianhui Qin
We focus on how to improve the text quality generated by the energy-based model.

TECHNICAL SKILLS

Programming Skills: C, Python, Pytorch, Pytorch Geometric

Language: CET4: 588, CET6:553, TOEFL: 97

TEACHING ASSISTANT

Intro to AI programming Undergraduate Course, Nanjing University Spring, 2023
